

MEETING AGENDA

DATE: TUESDAY, APRIL 11, 2017

CHAIR: FELIX

PARTICIPANTS: ELIAS, FELIX, ZACK AND JOHAN

1. OBJECTIVES (5 MIN). RESOLVE ANY ISSUES PREVENTING THE TEAM TO CONTINUE.

- Short clear descriptions

OBJECTIVES

- SDD planning
- Sequence Diagrams for iteration 1

2. REPORTS (15 MIN) FROM PREVIOUS MEETING

- Each group member reports outcome of assigned issues, see also 4)

REPORTS

FROM PREVIOUS MEETING

Felix completed the base implementation of the classes for the todo-list package, and has documented most of the public interfaces in the package.

Zack has also done some documentation on the code in the same package.

Elias and Johan have worked on the base implementation of the category-list package, with about equal work load distribution. Documentation has also been done here, but everything isn't documented as of yet.

EXTRA REPORTS

Zack has worked on the saving and loading functionality for storing and using data between runs. This functionality will be used for storing Settings, Statistics and Tasks to begin with, when all of these components have been implemented.

Felix has worked on the Android views and started setting up the different components for the Activities and Views. When this is done, then the controllers will be implemented to connect the Model to the Views.

Felix has also begun planning and structuring the sorting algorithm that will be implemented for the list of tasks. He has discussed this topic with Elias at some points, and the two has come up with a few interesting ideas.

Zack will add Git Statistics every Sunday to the repo, so that the group can keep track of their own coding statistics.

3. DISCUSSION ITEMS (35 MIN)

- Discuss issues from 1 and 2, possibly new or more general issues (very short notes and/or keywords)

DISCUSSION

SDD

The group read through the document and started to discuss possible work distribution.

SEQUENCE DIAGRAMS

Before the meeting, the group made two different sequence diagrams. These describe the different Use Cases for the first design iteration.

4. OUTCOMES AND ASSIGNMENTS (5 MIN)

- Outcomes from 3). I.e. write down what's decided and why it was decided? Sync with other documentation (add terms to wordbook)
- From outcomes, 1), 2) and 3) (re)assign each group member issues to solve.

OUTCOMES

SDD

As of now, there isn't too much that can be added to the SDD. We will wait until next meeting to decide on who will write what.

SEQUENCE DIAGRAMS

The two diagrams will be drawn in Visio and later put into the SDD.

ASSIGNMENTS

Elias and Johan will create the two different Sequence Diagrams until the next meeting.

Felix and Elias will read more into Fragments and the GUI for the Android framework.

- Elias will implement the navigation drawer
- Felix will create the ListView and the representation for each Task-element in the view and also read more into Adapters.

Johan will code the data for the color in the Label Category class and also read more into Fragments and the Android framework.

Zack will keep on working with Persistent data and the different tasks regarding that field.

5. WRAP UP - WRITE DOWN UNRESOLVED ISSUES FOR NEXT MEETING.

- Time and location for next meeting

PLANNING

Next meeting will probably be on Monday the 17th or Tuesday the 18th of April, depending on Easter scheduel
