REPORTS

Felix has refactored the TaskAdapter code together with Elias and made it so that the ViewHolders now are more compatible between different types of tasks and their corresponding layouts. Now the ViewHolders handle all checking for interaction with them and then notifies the Adapter using the EventBus.

Elias has worked a bit more on the navigation drawer and added extra a few new features for the looks. He also fixed a few small bugs.

Zack has worked on the SDD describing Persistent Data management, and he has worked TaskActivity. He's having trouble with the Event Bus and communication between Activities.

Johan has worked exceptionally well on the Achievement Classes and is working on handling Achievement-representation without depending on the Event Bus from the model.
